531 - South Cowichan Water Study Plan

The role of the South Cowichan Water Study Plan function is to cover expenditures related developing and implementing watershed management plans for the South Cowichan Area. This is a complex area with substantial population growth and a reliance on groundwater reserves. Given the limited funding what project expenditures are available will be used to develop a greater understanding of water resources in the function area. The program is currently on hold as watershed management plans are part of the Drinking Water and Watershed Protection program.
